

Form CRS – Client Relationship Summary SANOSTRO AG

Introduction

SANOSTRO AG is a Swiss-based investment adviser that provides digital, subscription-based quantitative investment research and market signals under the brand “SYGNAL.” We may also offer managed trading services on a limited basis, derived from our digital signals, for select high net worth individuals who have a long-term and close relationship with Sanostro AG. Our services are delivered online via our website, API data feeds, and integrated messaging platforms, making our research accessible globally.

What Investment Services and Advice Can We Provide You?

- **Digital Research and Market Signals:**
 We provide periodic newsletters and real-time market signals based on quantitative analysis sourced from vetted and qualified quantitative research teams and hedge funds. Please note that we do not produce our own research; instead, we rely on our trusted research providers. These signals indicate our market views (for example, whether we expect an asset’s price to rise or fall and our level of conviction) but do not constitute personalized recommendations.
- **Managed Trading Services:**
 On a limited basis, we may offer discretionary managed trading services in which trades are executed on your behalf based on our digital signals. Where offered, the client retains custody of assets and provides trade-only API key access to their own exchange account. This service is available only to select high net worth individuals with whom Sanostro AG has a long-term and close relationship.

What Fees and Costs Will You Pay?

- **Subscription Fees:**
 You will pay a subscription fee to access our digital research and market signals.
- **Managed Trading Fees:**
 Where managed trading services are provided, we may charge a management fee based on a percentage of assets under management as well as a performance-based fee of up to 30% on net gains.
- **Other Costs:**
 Please note that if you opt for managed trading services, your assets remain in your own exchange account. You may incur transaction fees charged by your exchange. These fees are paid directly to the exchange and are separate from our advisory fees.

What Are Our Legal Obligations to You and Our Conflicts of Interest?

As your investment adviser, SANOSTRO AG has a fiduciary duty to act in your best interest. Our compensation comes from subscription fees and fees for our managed trading services. Because these fees may create potential conflicts of interest—for example, an incentive to increase assets under management—we fully disclose these arrangements. We encourage you to review our complete disclosures in our [Form ADV Brochure](#) for detailed information on how we manage conflicts.

How Do Our Financial Professionals Make Money?

Our revenue is derived from:

- The subscription fees you pay for access to our digital research and market signals.
 - The management and performance fees charged on our managed trading services.
- We do not receive commissions on client-initiated transactions. Any fees charged by third-party custodians or for transaction processing are separate and are not shared with our firm.

Do We or Our Financial Professionals Have Any Legal or Disciplinary History?

SANOSTRO AG and its financial professionals have no material legal or disciplinary history that would affect your decision to work with us.

Additional Information

For more details about our services, fees, and disclosures, please refer to our complete Form ADV Brochure, which is available on our website or upon request. We encourage you to ask any questions you may have so you can fully understand the services we offer and the fees you will pay.

Get in touch with us to learn more!

Here are some questions you can ask us:

- “Given my financial situation, should I choose an investment advisory service? Why or why not?”
- “How will you choose investments to recommend to me?”
- “What is your relevant experience, including your licenses, education, and other qualifications?”
- “How might your fee structure and any conflicts of interest affect my investments?”
